| From the four model Xgboost is performing well. Xgboost is giving the accuracy of 94% with training data , 81% accuracy for the testing data.so we considering xgboost and deploying this model. |           |        |          |         |

## Evaluating Performance Of The Model

```
In [53]: from sklearn.model_selection import cross_val_score

xg = GradientBoostingClassifier()
```

```
In [55]: xg.fit(x_train,y_train)
```
